

DMITRY FILIMONOV

me@dfilimonov.com • +7 911 116-95-19 • St. Petersburg, Russia

PROFILE

I am the Founder, Developer and Designer of Thunder (<https://thunderapp.me/>) ; Back-end developer at Do You Like It? (<http://www.doyoulikeitapp.com/>) . I like creating stuff for the Web. I spend most of my time hacking on Ruby, JS and Objective C. I participate in the Open Source movement (GitHub <https://github.com/petethepig>) and occasionally write in my blog (<http://blog.dfilimonov.com/>) .

SKILLS

I started coding at school. The first programming language I learned was Action Script (Flash). Over the past years I've been working with PHP, Java, JavaScript, CSS, C, Ruby and Objective C. My main area of expertise is web development. I have experience in creating RESTful APIs and single-page web apps; optimizing static assets and slow SQL queries.

My practical skills are backed with good academic knowledge. I am well versed in algorithms and data structures, programming paradigms and databases. I have strong understanding of how modern web works, including HTTP, the principles of REST and CRUD.

I am excited about new technologies like Coffee Script and Node.js, and I am eager to learn some new stuff. My philosophy is *keeping things simple while being attentive to details*. Sometimes I design things, mostly for my own projects.

EDUCATION

Fall 2009 – Present Graduating in Summer 2014	Currently pursuing <i>Specialist degree in Information Technology and Systems</i> at <i>National Research University of Information Technologies, Mechanics and Optics</i> in St-Petersburg, Russia.
---	--

EMPLOYMENT

Nov 2012 – Present	Thunder (https://thunderapp.me/) — File-sharing app and web-service. Thunder is a one-man show. I designed and developed the back-end, the front-end and the Mac app. I used Ruby, Objective C, JS and CSS.
Nov 2012 – Present	Do You Like It? (http://doyoulikeitapp.com) — Instagram-ish iPhone app. I designed and developed the API: photos, followers, likes. Everything is pretty much the same like in Instagram.
Aug 2010 – Nov 2012	Sliday (http://sliday.com/) — a New Zealand based studio, specialized in making web sites and mobile apps. A lot of great websites. Flash, HTML5; PHP, Ruby and sometimes Java.
May 2007 – Aug 2010	Freelance Contracting A number of exciting projects, mostly Flash and PHP.
